Kentucky Derby Post Position History

The starting gate at Churchill Downs, made by United Pruett, accommodates 14 horses and has a six-stall "auxiliary starting gate" addition that can be attached. For the Kentucky Derby, the two sections are joined which enables the doors of each division to open simultaneously at the press of a button by Churchill Downs' starter Scott Jordan.

Once horses and jockeys make it to the starting gate, they're well-protected. All starting gates at Churchill Downs are outfitted with high-quality foam padding from Best Pad™, a leading innovator of safety products for the horse racing industry. This seamless padding is applied to all metal surfaces of the starting gate, including front and rear poles, face plates, handrails, superstructure, and pontoons. The use of safety padding protects both jockeys and horses from injury as they begin each race.

Post positions shall be determined by a nontransferable lot number being drawn for each horse named as a starter at the Closing. The lot number drawn for each starter shall determine the post position of such starter. Horses having common ties through ownership or training shall each be treated separately for purposes of determining post position.

In the event of one or more scratches after the determination of post positions and prior to the Scratch Deadline, then (i) starters with post positions higher than the post position of the scratched starter will be moved to the next lowest empty post position (i.e., toward the inside rail of the race track) and (ii) the Also Eligible Horse that becomes a starter (if any) will receive the lowest post position available after the post positions of the other starters have been moved as provided above. In the event one or more scratches occur after the Scratch Deadline, no Also Eligible Horses will be permitted to start and the post positions shall be moved, without changing the order of the starters, as determined by the stewards and CDI to be in the best interests of the safety of the race participants. Post positions shall be moved for each scratch that occurs so that there are no empty post positions in-between horses at the start of the Kentucky Derby. Detailed rules governing the post-position draw process are available from the Racing Secretary's office and will be distributed prior to the Closing.
